

The 'Big Builds' Programme

Paul Fenton, Director of Estates & Facilities

South Retail Area – Ipswich

- Enhanced retail offering at Ipswich utilising courtyard infill to accommodate the new Emergency Department and Urgent Treatment Centre expansion (Units 1-3)
- Further refurbishment of Retail units at Entrance 6 now planned

South Retail Area – Ipswich

Child Health Development – Ipswich

- Increase number of beds, isolation cubicles and clinic rooms
- Dedicated areas will be available for patients who need physiotherapy or have diabetes or cystic fibrosis.
- Two-bed high dependency area will also be created, along with
- Multiple break-out play areas and Separate dining room
- More space will be available in bays for specialist equipment, or for parents to stay overnight.
- Create a modern, calming environment
- Approved by the Trust Board
- Commencing April 2022
- 18 months construction programme

New Admin Block at Ipswich

- New Office block to enable works to commence on Breast Care Centre at Ipswich
- 2 year old modular building to accommodate 112 clinical support staff
- Completed and occupied March 2022

Breast Care Centre at Ipswich Hospital

- The new centre will transform the experience patients have when they come to hospital by bringing all elements of breast care under one roof – the clinic, the imaging department and hospital breast screening.
- Approved by the Trust Board
- Commenced on site March 2022
- Completion December 2022

Temporary Vanguard Operating Theatres at Ipswich

- Arrived at Ipswich at the end of July 2021
- Operational from August 2021
- On site for 12 months to support additional elective activity, helping to reduce our backlog of patients awaiting surgical procedures

Temporary Urgent Treatment Centre at Ipswich

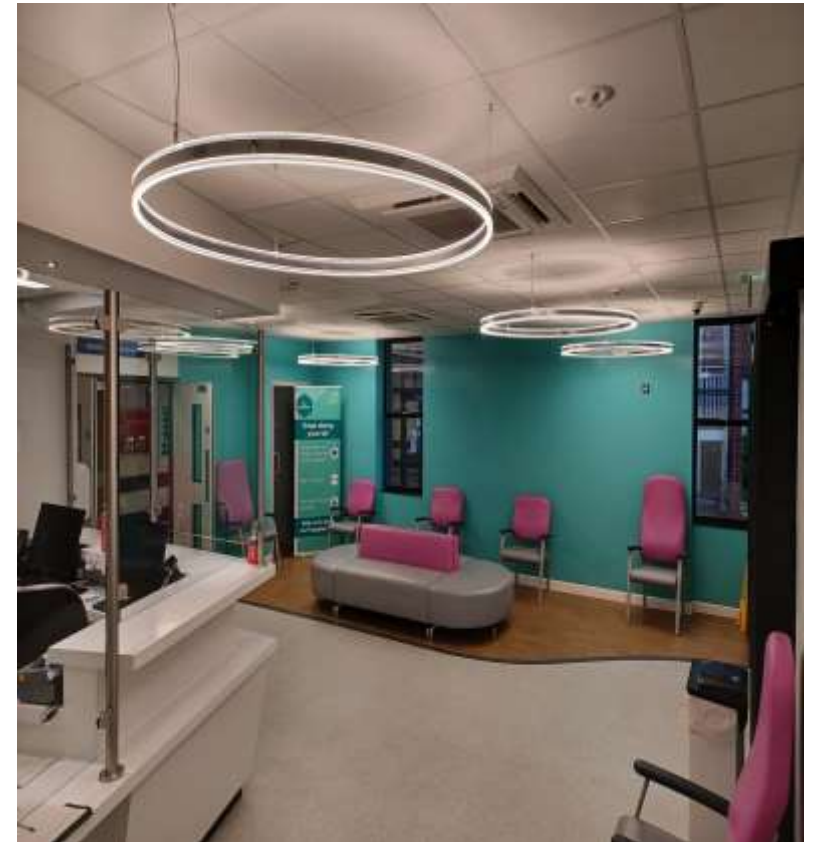

- Temporary UTC to enable construction of the new ED/UTC main building

New Emergency Department (ED) & Urgent Treatment Centre (UTC) at Ipswich Hospital

- Investment in New Emergency Department and Urgent Treatment Centre at Ipswich Hospital
- Works commenced December 2021 – completion in early 2023
- Providing a single front door which all urgent and emergency patients will use before they are triaged by our clinical staff and directed to either the UTC or ED, depending on which service will best meet their needs.
- By ensuring that patients are seen by the right team first time, this exciting development will improve their experience of accessing care while reducing the amount of time they need to wait for treatment. At the same time, it will help us to make sure our emergency department remains available to those in the greatest clinical need.

Also providing improved public transport links and accessible drop off.

Clacton Community Diagnostic Centre

Construction - the new £22m facility is being built at Clacton Hospital. Picture:

IRCA – Completion Mid May 2022

(Interventional Radiology Cardiac Angiography)

- State-of-the-art specialist centre for diagnostic cardiac and radiology procedures at Colchester
- Staff on the unit will be able to carry out a range of radiological procedures, usually involving the insertion of a needle, cannula, catheter or wire into a patient for diagnosis and/ or treatment. This type of minimally invasive technique will reduce the level of risk to the patient, meaning they spend less time in hospital and can recover quicker.
- As well as providing facilities for cardiac angiography, the new unit will also be used for state of the art MRI conditional pacemaker implants and other procedures.
